## About Us

The positive approaches to strengthen social life are possible to change vulnerable lives for better. It demands common ground and willingness to take the challenges in dealing with human suffering.

The most effective methods are compassion, encouraging, supporting and donating to shape physical lives of vulnerable people. Human suffering increases because vulnerable people do not have the adequate resources to bring the needed changes in their lives. They needed to be helped.

This is the reason why VFCP seeks to raise the awareness of Vulnerable Free World to fight poverty through Vulnerable Free Community Project to make vulnerable persons worthy in human society to enable them to give their positively contributions to their communities.

VFCP believes that poverty is the greatest enemy holding back human progress. Poverty affects general well-being of an individual. VFCP is for everyone regardless of race, culture, religion or educational backgrounds. Therefore, VFCP invites you to join in the fight to improve vulnerable lives in communities. Vulnerable Free Community is an inclusive environment respecting each other's dignity, working together in creating vulnerable free communities across the globe.
